# 3P Third Party Testing

3P Third Party Testing is an independent testing laboratory serving the international cabling and electronic industries.

Our main product is certification testing of components for communication cabling, i.e. cables, connecting hardware, patch cords, and permanent links and channels. Other core activities are CPR fire and safety testing of cables, and quality evaluation and failure analysis of printed wiring boards and electromechanical components.

The staff of 3P includes electronic and materials engineers, and our key engineers have been working with performance of data cabling since the mid. 1980's.

## CPR

CPR – short for Construction Product Regulation (EU 305/2011), has been implemented recently. Products to be used in construction works etc. shall meet a number of requirements set forward by the new regulative such as mechanical-, fire safety- and environmental properties.

## How to obtain 3P CPR verification

In order to understand what 3P can offer of CPR verification, it is important to understand the structure of the different fire classes obtainable. [Read More...](#)

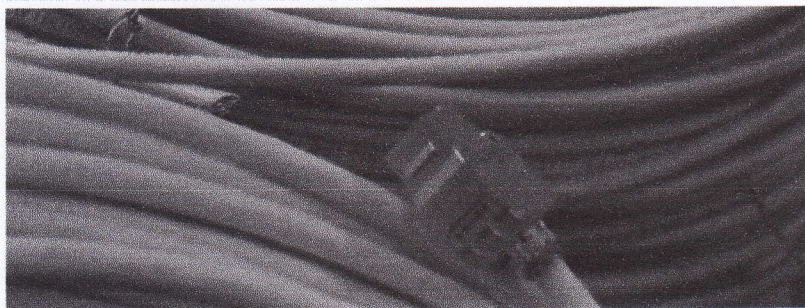

## Frequently asked CPR questions

The recently introduced Construction Products Regulation (CPR) lays down harmonised rules for the marketing of construction products in the EU according to the product standard EN50575:2014 [Read More...](#)

## 3P Qualified Producers

---

3P certification of communication cables is always carried out as a qualification of the full production line including approval of product, production line and quality assurance... [Read More...](#)

## PCB Analysis

---

The internal quality of a printed circuit board can be inspected and verified by using Cross Section Microscopy.... [Read More...](#)

## About us

---

3P Third Party Testing has been in business since 1995 and is a leading test laboratory
